THE PIONEER MILLS. - As will be seen by an advertisement elsewhere in to-day's Guzette, these valuable mills are soon to be soid at pubhe auction under a decree of the Corporation Court of this city. They possess all the facilities necessary for milling purposes on a large scale, being furnished with clevators, by means of which grain can be taken directly from vessels and transposed to the hoppers, thus saving the expense attending the usual mode of handhing; and being supplied with the latest and most improved machinery, in the purchase of which no cost was spared, and which is capable of turning out six hundred barrels of flour per day. At small expenditure this could be put in good working order, and there is no reason why under the management of business men of capital the mills would not yield a handsome

hopes of some of the fishermen are reviving. One load from Chapman's contained 300 shad and 38,000 herrings, and the number caught there was increasing so rapidly that another vessel was sent for to bring them to market.
The Port Tobacco Times says: "Thus far the fishing season in this county has been one of almost upparalleled failure. None of the shores are making anything like current expenses. REGISTRATION. -To-morrow will be the last day of registration, and, it is again urged upon every Conservative who has come of age or changed his residence since the last election, that he take the little trouble necessary to enable him to vote on the 27th just., and to see that his neighbor does the same. But few names have as yet been added to the books.

The Attorney General. NEW YORK, May 12. - The Tribuue says Judge Edwards Pierrepont, the recently appointed Attorney General, returned home Suaday from Washington, where he had been for several days preparing to take formal possession of the Attorney General's office on Saturday next. It is understood that there will be a thorough and general reorganization of the Attorney General's office upon Judge Pierre pout's entrance, and that the President has desired Judge Pierrepont to reorganize it entirely upon his own responsibility without any Executive interference. It is stated that there are a large number of prominent applicants for the position made vacant by the resignation of Assistant Attorney General Hill, which takes effeet on Saturday next. His successor, however, has not been yet designated, although the vacancy will be filled in a few days. The new Attorney General is in entire sympathy and accord with Secretary Bristow's financial policy. He is opposed to certain features of the past reconstruction policy in the Southern States which he has always maintained could be productive of no good either to the States severally or to the country at large.

Foreign News. LONDON, May 12.-The Post publishes an address of the Cabrerist General Aguirre to Navarrese and Basque Carlists, inviting them to turn their arms against their leaders, who prolong the war only to eurich themselves. It declares the events of the last two years only show the inaptitude of Don Carlos, who has lost his right to the crown before God and the world. Aguirre is exceedingly popular, and it is confidently claimed that his cutry into Spain will cause large defection from the Carlist ranks.

IMPORTED ONLY BY THE

GUANAHANI GUANO COMPANY. PETERSBURG, VA.

In offering this FERTILIZER to the Agricultural Community a Second Season we do so with the utmost confidence, feeling satisfied that the high opinion we formed and expressed last season, based on its Chemical Constituents, has been most satisfactority borne out by the test by which all Fertilizers must be judged—that of the Plantation.

Last season, owing to the lateness at which we commenced importing, we were forced to put our Guano on the market at once, but now having continued our importations during the summer and fall, and having large and well ventilated Warehouses in Petersburg and City Point, we are enabled to put our Guano on the market in a condition, as to dryness and freedom from lumps, equal to any manufactured Fertilizer.

We solicit a careful perusal of our Circular, containing the certificates sent us, and which can be had on application at this OFFICE, or from any of our AGENTS. Having nothing to conceal, we made an Enovation on established usage, by publishing those letters received unfavorable to our Guano; but careful inquiry in many cases proves that the cause of its failure was not owing to any fault in the Guano, but to those far beyond our control. We have frequently heard the same complaints of its kindred Fertilizer, Peruvian Guano, but the concurrent testimony of we'l known Farmers and Planters from Maryland to the extreme Western counties of North Carolina, justify us in claiming a place for our Fertil zer Superior to many, and Second to None.

We confidently expect the continued patronage of the Agricultural Community, and no exertion shall be spared on our part to make
